

HEAVY MEMBRANE ROLLERS

*Use to eliminate bubbles, waves, folds, or crimps.
Ideal for rolling out and setting membrane systems:*

- Peel-and-stick systems
- Self-adhering systems
- Fully adhered sheet membrane
- Sheet membrane seams

**MADE IN
USA**

MR02490 Steel Membrane Roller –

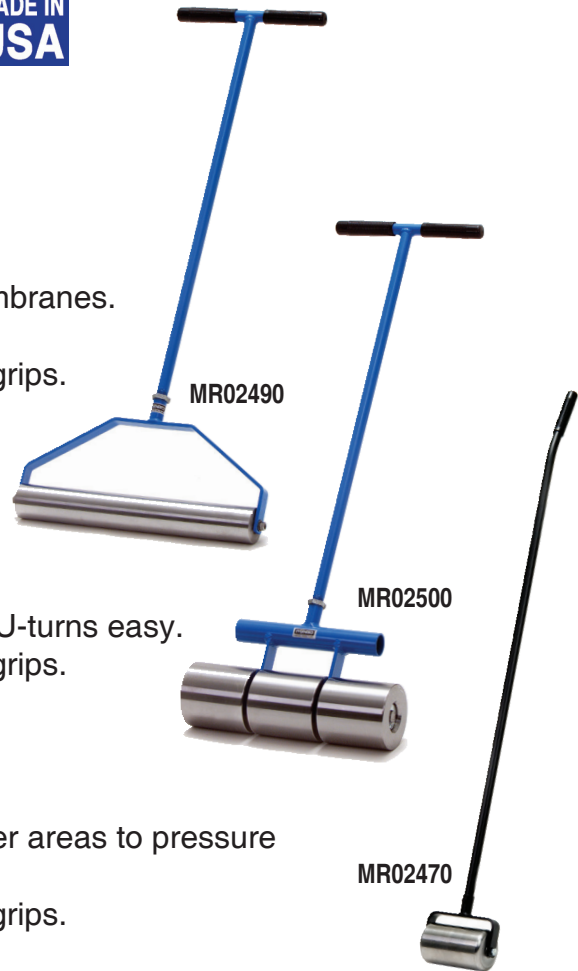

- 2-1/2" dia. x 18" wide x 40-3/8" high
- Use for field and sidelap areas with thinner membranes.
- 28-lb. weight helps to get best adherence.
- Includes 32" removable solid steel handle with grips.

MR02500 Steel Membrane Roller –

- 4-1/2" dia. x 15" wide x 40-1/2" high
- Use to pressure set the membrane adhesive to the substrate.
- Three rollers turn independently, helping make U-turns easy.
- Includes 32" removable solid steel handle with grips.

MR02470 Steel Membrane Roller –

- 3-1/2" dia. x 6" wide x 52-3/8" high
- Smaller, but still heavy, steel roller uses in tighter areas to pressure set the membrane adhesive.
- Includes 48" removable solid steel handle with grips.
