

# Klenk® LONG CUT Aviation Snips

**Specially designed for cutting aluminum and vinyl siding and roof flashing**

**PERFECT FOR SIDING!**

**1 CUT = 2 1/4"!**

*Longer compound leverage and spring-action handles provide easy cutting.*

*Serrated blade edges allow cutting without slippage!*

**KLENK AVIATION SNIPS**  
America's Oldest  
Aviation Snip Manufacturer

## Advantages for the Trade Professional

**Faster, Easier Cutting:** Klenks are designed and engineered for precision work. Double-cam action provides greater cutting power with less effort. Maximum opening of jaws with minimal opening of handles.

**Longer Life Out On The Job:** Klenk blades are fabricated from tool steel and heat-treated for hardness. Klenks retain the sharp cutting edge you need, under heavy use and on rigorous jobs. Just like the day they came off the assembly line.

**Greater Efficiency:** The comfortable, ergonomic handles combine longer leverage with spring-action, saving you time and effort -- and producing the results you want.
